

# Simple, Scalable & Always Connected

Kajeet smartSIM is a single, physical SIM that supports multiple carrier profiles, enabling intelligent, remote network management.

This advanced technology keeps devices connected without manual interaction which is especially important for large IoT deployments where users are geographically dispersed or travel frequently.

## BENEFITS OF CHOOSING KAJEET smartSIM

### Optimal Connectivity

A strong partnership with the major carriers allows Kajeet to offer the best coverage nationally on a highly secure network.

### Easy Data, Device & Profile Management

The **Kajeet Sentinel** platform is a single pane of glass that simplifies the management of devices regardless of geography. It monitors smartSIM connectivity and enables administrators to remotely switch networks without the need for manual interaction.

### Future Proof

By using the most recent eSIM IoT technology, the Kajeet smartSIM is built to evolve with new communications technologies, extending the lifecycle of field devices and eliminating additional touch points.

### Kajeet smartSIM Data Plans

Kajeet has negotiated competitive rates with the major carriers so customers only have to process one monthly bill AND receive the best pricing regardless of network. Data usage pools across networks and devices in order to receive the lowest rate.

## SENTINEL PLATFORM FEATURES:

**Security & Threat Protection**

**Device & Data Management**

**Reporting & Analysis**

**Integration & Automation**
