

PRIVATE WIRELESS

KAJEET® SUCCESS STORY

Nebraska Indian Community College: Delivering Secure and Reliable Internet to Students

Kajeet Private Wireless is a next-generation solution that lays the foundation for a custom network that keeps communities connected to high-speed Internet. We draw from 20 years of wireless connectivity experience to **design, install and manage** a private network built for the unique needs of each community.

KAJEET PRIVATE WIRELESS BENEFITS

- Custom network designed & built to meet performance goals
- Community-wide coverage
- Simple cloud-based management & control
- Seamless integration of applications & back-end systems

KAJEET HELPS NICC DEPLOY A PRIVATE WIRELESS NETWORK

Nebraska Indian Community College (NICC) is dedicated to bringing state-of-the-art facilities and programs to students. Established in 1973, NICC was created to provide post-secondary education to residents on the Omaha, Santee Sioux, and Winnebago reservations. Today, the institution is accredited at the associate degree granting level, with three campuses located in Northeast Nebraska.

Like many Tribal Lands, the college operates in rural areas where reliable broadband doesn't exist. NICC decided to use the 2.5 GHz broadband spectrum they were granted access to on an EBS license to provide high-speed Internet to their students. The college enlisted the help of Kajeet who created a custom, **private LTE network** by installing base stations on each campus, then deploying a variety of connected devices to students. NICC was able to meet their objective of enriching the learning experience through state-of-art programs.

"Kajeet was able to work with NICC to identify our needs. The Kajeet engineering team continues great customer service and delivers customized design that meets the unique needs of our NICC Campus and tribal community. We continue to choose Kajeet Private 5G for their cost effectiveness, their easy and rapid deployment capability to ensure our students have the most robust internet connection with an economical communications solution. Through the partnership of Kajeet Private 5G, NICC has truly been able to "connect the unconnected" with an economical and reliable communications solution."

Michael Oltrogge,
*President of the
Nebraska Indian
Community College*
